

Ammonia Refrigeration Service Technician

Are you a skilled technician interested in working on a variety of equipment for a wide range of customers? Are you eager to help customers solve their needs while working as part of a professional team?

Carlson & Stewart Refrigeration, a Midwest leader in Industrial and Commercial refrigeration, is seeking permanent full-time Ammonia Refrigeration Service Technicians for its Sauk Rapids, MN and Marshall, MN locations.

The Refrigeration Service Technician is responsible for the maintenance, diagnosis and repair of Ammonia refrigeration systems. Successful candidates will be able to troubleshoot and diagnose system issues and perform necessary installations and repairs on equipment and systems utilizing Ammonia/NH3 refrigerants. A high level of electrical and mechanical diagnostic skills is required.

About the Position

- Full time position with company benefits.
- Weekly pay.
- Starting hourly rate based on experience.
- Per Diem plus hotel paid when travel required.

Other job requirements are as follows:

- Valid driver's license and a safe driving record
- Physically able to climb ladders, work at high elevations and lift objects up to fifty pounds
- Excellent verbal and written communication skills, detail oriented and highly motivated
- Must understand and adhere to all work safety policies and procedures
- Develop and maintain excellent customer relations
